

## Early predictive dysmorphic features of PMM2-CDG

**Dr Antonio Martinez-Monseny**

San Joan de Deu Hospital, Clinical Genetics Unit,  
Department of Genetics and Molecular Medicine,  
Barcelona, Spain

I'm Antonio Martinez-Monseny.

I'm a pediatrician with more than 3 years of experience in Clinical Genetics working in Genetics and Molecular Medicine Department and Rare Diseases Pediatrics Unit of Sant Joan de Deu Hospital in Barcelona.

I'm really interested on dysmorphology field including the syndromical recognition patterns and the diagnosis, research and following up of children with genetic disorders. My research interests focus on PMM2-CDG and I'm currently finishing my PhD in a work entitled: "Characterization of PMM2-CDG patients: clinical spectrum and molecular correlation."
