

Dr. Chantal Verhille

Dr Chantal Verhille concluded her MSc's degree in physiotherapy motor revalidation in 1986. Following the completion of her MA she did several specialization courses, namely in pediatrics and Bobath. In addition to these specializations, Dr. Verhille has also gained experience in various disciplines, such as child neurology, mentally and physical retarded children, muco, neuromuscular diseases, oncologic, psychosomatic, gastro-entero, nefrologic, and general physio treatments for children. With over 30 years of experience in phsiotherapy, mainly focused on pediatric revalidation, for the last 15 years Dr Verhille has been predominately dedicated to metabolic diseases, like osteogenesis imperfecta and CDG. Currently and since 1992, she has been working at UZ Gasthuisberg, Department Peditry, Leuven, Belgium. Dr Verhille hopes to keep contributing to the motor development and improvement of CDG patients.
